1 Motivation

What is it you are trying to solve? Why is it important? What is the question that this is trying to solve?

2 Prior Work

Nothing in depth at this time (that comes with the Intermediate report writeup), but at least a perusal of what you think are the most relevant papers.

3 Methodology

Low-level details aren't strictly needed at this time, but what broadly do you intend to do? Create a new tool? Collect a new dataset? Analyze and existing dataset?

4 Evaluation

What are your metrics for success? Performance? Privacy? Predictive ability of a new model? Will you be comparing to any other prior approaches?
